Acknowledgments

The data contained in the Utah Employers, Employment and Wages by Size was prepared by the Workforce Development and Information Division of the Utah Department of Workforce Services in connection with its normal operations. Specifically, this employment and wage data was compiled in fulfilling contracts with the U.S. Bureau of Labor Statistics.

Many individuals within Workforce Information contributed to this publication. Special recognition is given to the following staff:

Kris Beckstead
Austin Sargent
Eileen Schroeder

DEFINITIONS		39

INTRODUCTION

The Utah Department of Workforce Services compiles quarterly employment and wage data for non-agricultural employers in Utah. Data is maintained at the establishment level (i.e., store, plant, or other type of permanent worksite facility). Since these establishments are assigned an industry and county code, their employment and wage data can be aggregated into common industry and county groupings for analysis purposes.

Employment and wage data for Utah's non-agricultural employers are categorized in this publication by employment size for the month of March in each of the designated years. Grouping data by this criterion provides a useful tool to analyze the characteristics of Utah employers. For example, general trends of the size of Utah employers and employment concentrations by employer size class can be observed. Wage levels for large, medium, and small firms can also be evaluated.

In this publication, data is presented for both establishments and firms. The term "establishment" is generally defined as a specific physical worksite for an

employer. For most employers, this is the actual street location at which business is conducted. For others, with no permanent worksite (such as salesmen, factory representatives, or distributors) it is the location from which they conduct their business (sometimes residences).

For construction and some mining firms, it is the Utah headquarters or office location rather than the actual jobsite. Some employers conduct business at multiple establishments or worksites within the state. In this situation, data in the "establishment" tables are presented separately for each establishment or worksite.

In Utah, just over 2,200 firms are multiple worksite employers comprised of over 17,000 worksite establishments. The term "firm" is used to identify an employer's total statewide operations. In this situation, data for multiple establishment employers are aggregated to a statewide total for assignment to a size category in the "firm" tables.

SECTION I

**UTAH FIRMS, EMPLOYMENT AND WAGES,
BY EMPLOYMENT RANGE, FIRST QUARTER 2007**

**UTAH ESTABLISHMENTS, EMPLOYMENT AND WAGES,
BY EMPLOYMENT RANGE, FIRST QUARTER, 1996-2007**

SECTION I

UTAH EMPLOYERS, EMPLOYMENT AND WAGES, BY SIZE

For the first calendar quarter of each year, establishment employment and wage data are summarized into ten separate size classes. These ten classes or categories, which are based on March employment levels, are as follows: 0, 1-4, 5-9, 10-19, 20-49, 50-99, 100-249, 250-499, 500-999, and 1,000 and over.

Since Utah employers are primarily small-sized establishments, the number of establishments in each size category varies inversely with the size class, i.e. the smaller size classes have the largest number of establishments. In fact, almost one-half of Utah's establishments employ fewer than five workers and over 99 percent employ fewer than 250 workers.

The distribution of employment within these ten size classes is different than the distribution of the establishments. While over one-half of the establishments are in the two smallest size classes (employing 0-4 workers,) less than 6 percent of nonagricultural employment is there.

The highest nonagricultural employment concentrations are actually found in the middle size classes with a large concentration also in the largest size class. The four middle size classes, employing 10-249 workers, contain over 57 percent of nonagricultural employment, while only 25 percent of establishments are represented there.

In general, average monthly wage levels tend to correspond with increases in size class. The first two size classes break this pattern, however. This is primarily due to high concentrations of professional organizations in these small size classes, which tend to pay higher than average salaries. These factors raise the average wage level for small firms.

1/ The number of firms is a count of employers. If an employer operates at multiple worksites, it is counted as one firm for purposes of this table.

2/ For the firms which had zero employment in March, there were wages paid during the quarter to employees that worked in January and/or February.

DEFINITIONS

Nonagricultural Employment: A three month average of the number of nonagricultural employees reported to the Utah Department of Workforce Services by employers subject to Utah's unemployment insurance laws, federal agencies in Utah subject to the Unemployment Compensation for Federal Employees (UCFE) program and other Utah nonagricultural employers not subject to unemployment insurance laws.

As a result of multiple job holding and payroll turnover, some workers are reported by more than one employer. Therefore, the count is of jobs, not persons.

Nonagricultural employment includes most corporation officials, executives, supervisory personnel and clerical workers. It excludes proprietors, self-employed, and unpaid family workers. It also excludes persons who neither worked nor received wages as a result of strikes or work stoppages, temporary layoffs or unpaid sick or vacation leave.

Establishments: Any firm, organization or division for which data are separately reported to the Utah Department of Workforce Services, i.e. individual physical facilities such as stores, plants, offices, and other worksites.

Firms: Data for multiple-establishment employers are aggregated to a statewide total.

Total Wages: All quarterly remuneration paid to nonagricultural workers, including gross wages, commissions, bonuses, cash value of meals, lodging, and other gratuities when furnished as payment for the job. Reimbursement for travel or other business expenditures is not included.

Average Monthly Wage: "Total Wages" divided by the number of employees on nonagricultural payrolls.

Our Mission

The Mission of the Utah Department of Workforce Services is to provide quality, accessible, and comprehensive employment-related and supportive services responsive to the needs of employers, job seekers, and the community.
